HAY and PASTURE MIXTURES

BIRDSFOOT TREFOIL MIXTURES

FOR HAY, SILAGE OR PASTURE Birdsfoot Trefoil _______ 7 lbs. or 3½ qts.
Timothy _______ 5 lbs. or 3½ qts.
Total for 1 scre ______ 12 lbs. or 7 qts.

This mixture is suitable for long rotations and for areas to be left continuously in hay or pasture. It is recommended only where the seeding is to be left down for three years

Empire Trefoil is first choice for long-term stands on acres difficult to plow or for continuous grazing. It will also cut high-quality hay from 10 to 20 days later than Red Clover or the European type.

European or Viking Trefoil is better suited for hay and may be used for rotated pastures. Hay yields higher than Empire and matures at time of Red Clover; establishes itself quicker and recovers faster after cutting.

FOR FIELDS WITH SPOTTY DRAINAGE

Total for one acre 16 lbs. or 9 qts.
